

Operation Empty Quiver

Simple Stealth Kill Rules

1. Each player will be issued two (2) “kill tags” with their registration package.
2. To accomplish a stealth kill a player must successfully approach an opponent without being seen and touch the opponent with their weapon (preferably a rubber training knife or similar weapon).
3. Upon contact the opponent must then relinquish one (1) kill tag to his / her assailant.
4. The “dead” player must then adhere to the standard rules for respawn before re-inserting into the game.

The player with the most kill tags at the end of the game will be recognized with a prize.
